

## Insurance claims Web Portal, AfintaPart

*Absol Internet Business Solutions* has developed the AfintaPart Insurance portal, a custom web based solution, to provide assessors who form part of the SANTAM group the ability to complete their entire claims process digitally.

The solution not only allows AfintaPart to control the entire claims process but also enables authorised users to manage their entire catalog of genuine aftermarket vehicle parts.

## Solution Details

The AfintaPart Web Insurance Portal has been developed with the primary goal of enhancing the entire claims process by providing a digital solution to capture and process RFQ's made by assessors who form part of the SANTAM insurance group.

The solution has been designed around an extensive range of genuine vehicle aftermarket parts offered by AfintaPart and can be accessed conveniently through any modern device. This provides authorised users access to the system through a variety of platforms enabling them to accomplish their daily tasks

## System Technology

The system has been developed as a classic client-server web based application which consists of:

- A Single Secure Server
- A management interface accessible from any end point which communicates directly with the server
- A cross browser compatible C# .NET Core Framework web application
- A relational database to enable comprehensive reporting
- REST Architecture enabling integration with authorised third party solutions

The technology stack / architecture makes the system easy to migrate to the cloud and is scalable.
